DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: claims are allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose a reception apparatus for receiving broadcast signals transmitted with multiple multiplexed services, wherein the broadcast signal contains a first stream for burst-transmitting packet sets carrying content for each service, and a second stream for continuously transmitting packets carrying content for each service at a speed determined by the a transmission rate required for the service; the reception apparatus comprises an operating section used by a user for specific operations, a reception section that receives a broadcast signal, and a playback section that decodes and reproduces the received data; a zapping mode is set as the an operating mode until burst data for the first stream related to a selected service is received when one service is selected by the operating section, and operation is changed from the zapping mode to an intermittent reception mode when transmission of burst data for the first stream related to the selected service begins; in the zapping mode, the reception section receives data for the selected service in the second stream, and the playback section reproduces data from the received second stream; and in the intermittent reception mode, the reception section receives data for the selected service in the first stream and the playback section reproduces data from the received first stream.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
